Subject: #1 Notice of Upcoming Stock Water Run – December 11, 2026.

Subject #2 Deschutes Soil & Water Conservation District Landowners Cost-Share Dollars Available.

Dear Patrons,

Please be advised that a stock water run is scheduled to begin on **Friday, December 11, 2026**, and will remain active for one week. Please understand that this stock run is weather and temperature dependent and may be rescheduled or cancelled if conditions don't allow.

While we will make every effort to deliver water to you, please note that deliveries will be below your full water right. We will be rotating a limited supply between open laterals, and we cannot guarantee that water will reach every patron who needs it. Additionally, to prevent freeze damage, we will not send stock water through any piped laterals.

Please keep the following guidelines in mind during this run:

- **Permitted Use Only:** Stock water is strictly for hooved livestock (such as cattle, horses, sheep, and goats).
- **No Irrigation:** Stock water may not be used for irrigation, filling ponds, or any other non-livestock purposes.
- **Head Gate Closure:** If you do not currently have hooved livestock on your property, you must contact our office before **December 11th** so our crew can ensure your head gate remains closed.

To request a head gate closure or if you have any questions regarding the upcoming run, please call our office at **(541) 382-7664** during regular business hours.

Thank you for your cooperation in helping us manage our water resources effectively.

Please see AID website for Deschutes Soil & Water Conservation Districts SWAP 2026-2027 Irrigation Cost-Share program for landowner Irrigation projects. $60,000 Maximum Award per Landowner.

Sincerely,
District Management
