Patron Communication – **DELIVERY TURN ON CLARIFICATION**

This communication is being provided for clarification of the turn ON and turn OFF process requests. Stock run water starts March 25 then transitions to irrigation water on April 1.

For patrons receiving water through the Main Canal pipeline, all gates have been closed. If you have hooved animals and want stock run water, please call the Office. If you want irrigation water, please call the office to have your gate opened after April 1.

For patrons receiving water from the open main canal or laterals, all gates have been left unchanged since the end of season last fall. Please call the office if you need your gate opened or closed for either stock or irrigation water. Note, stock run water may not be used for irrigation.

All requests for headgate adjustments must be made by calling the office at 541-382-7664. A 24-hour advance notice is required. Requests are not accepted by email. Requests called in on Friday and through the weekend will be handled Monday.
