

Arnold Irrigation District (AID)
Important Patron Communication
August 17th, 2026

Dear Patrons,

We are faced with an emergency shut off due to the storage report showing natural flow has dropped 100 cfs (cubic feet per second) in the past two weeks. We have used all our allocated storage, and this leaves us with no choice but to shut off tonight at 10pm. We are sorry for the short notice, but we have no choice but to close our river headgate promptly.

We will keep you informed as we get closer to the shoulder season and the September 15th date that we planned to turn back on if natural flows are available as the senior water right districts turn down.

We apologize for any inconvenience.

Sincerely,

Arnold Irrigation Management
