

Arnold Irrigation District (AID)
Patron Communication
October 13th, 2026

Attention Patrons,

The District will be shutting off the water tonight, October 13th, around midnight due to a developing leak in the Main Canal pipeline that requires repair. This shut off will mark the end of the 2026 irrigation season.

We understand that this season has brought unexpected shut offs and disruptions, and we sincerely appreciate everyone's patience, understanding, and cooperation throughout the season. We recognize the challenges these interruptions have caused and are grateful for your continued support as the District works to maintain and operate the irrigation system.

Thank you for being part of the District and for your patience throughout the 2026 irrigation season. We appreciate the opportunity to serve you and look forward to another irrigation season next year.

If you have any questions please call the office.

Sincerely,
Arnold Irrigation Management
