Patron Communication

September 23, 2024

Dear Patrons:

Water availability, both in terms of flows in the Deschutes River flows and AID's reservoir storage, continue to be favorable. The district's plan remains to run water through *September 30th*. Beginning *October 1st*, water will be off at the river and preparation for construction on Phase 2 of the main canal piping project will begin.

Phase 2 of the project will, like Phase 1, install approximately 20,000 linear feet of main canal piping. Construction activities for Phase 2 will be more complex than Phase 1 as construction for the project will cross China Hat Rd., Knott Rd. and Woodside Rd., requiring work on both the roadways and the utilities that are installed in the road right of way. The district will update the patrons periodically as construction progresses.

The board has not yet established a formal date for the beginning of the 2025 irrigation season. Depending on Phase 2 construction and testing, we anticipate a turn on date between April 15th and April 30th, 2025. More information will follow as we get closer to the 2025 irrigation season.

Please contact the office or the board member for your district if you have any questions.

Sincerely,

Colin Wills
District Manager
