

Arnold Irrigation District (AID)
Patron Communication
September 25th, 2026

Attention Patrons,

A tentative date for the water shutoff has been set for Thursday, October 8th. This shutoff date is weather and demand dependent. If we begin experiencing consistent rain and cooler temperatures, patron demand will likely decrease, which could require the District to shut off the water earlier than October 8th. If we experience warm, dry weather, it may be possible for the District to continue operating past October 8th.

The District will continue to monitor weather conditions and patron demand and will keep everyone updated as we move forward.

Thank you,

Arnold Irrigation Management
